

Maths at Clockhouse

What is going well?

- The adults know us well and use assessment to support and challenge us
- Concrete resources are used to support with our learning.
- Our learning is well matched to our stage in learning and support is in place to help us progress
- Adults have high expectations of us and what we can achieve
- We have a good understanding of the key vocabulary

Having fun with maths!

What do the children think?

We use our fast eyes to subitise so we don't need to count! EYFS

I love the challenges and using cubes and the Numicon to show my maths-
Year 1

My favourite bit of maths is being challenged. I love new learning new things
and we have enjoyed challenging ourselves with the times table booklets - Year 2

I enjoy the challenge in maths. I have learnt a lot about time, shapes and frac-
tions this year. I am getting better at my times tables - Year 3

I have learnt different strategies to solve multiplication and division problems
and I know how to check my answers - Year 4

Maths is great because there are so many different parts to it. There are different
ways of figuring out the answer and I like working with other children to find
different possible solutions - Year 5

It is important to learn through your mistakes. Challenge is good in maths be-
cause it means we are learning - Year 6

Real life maths!

During Enterprise Week, we
create our own stall and try
to make the largest profit!

During Aspirations Week, we
learnt about different
professions and how they
use maths.

THE CLOCKHOUSE WORKFORCE!

We earn Clockhouse Pounds
throughout the year and get
to spend time on prizes of
fun activities!
